FRISTED by charlotte mansted & himalaya

is a collaboration
between the Frieborg family in Germany
with their well-known brands
Himalaya and Anna & Lena
and Charlotte Mansted
a Danish designer
with a clear focus on knitwear

it's about
knit craft
colour therapy
& nature's
own materials

Fristed knitwear is created for women
who dare to use colour,
and appreciate the pure qualities
in yak & lambswool
merino & cotton

COLOUR THEMES

COLOUR COORDINATING IS KEY

Please sort your samples into the 3 colour themes

When presenting the colour themes,
please show a few
sweaters in each theme - please make sure to show
multi-coloured series - as Q & H, that shows
the colour themes well

LAMBSWOOL

Lambswool comes from a lamb's first shearing, typically when the animal is around seven months old.

The fibres are naturally fine, soft, and lightweight. The wool is obtained only once in the sheep's lifetime, making it a limited, premium fibre.

The lambswool is eminent at showing the beautiful melange shades of the yarn.

MERINO

Merino wool originates from the Merino breed of sheep. The wool is shorn annually.

Merino wool offers numerous advantages : A single Merino wool fibre is 1/3 the diameter of a human hair, which is why it is super-fine and soft.

It provides good insulation, transports moisture and has anti-static properties;

it is lightweight and keeps its shape.

And it does all this in a completely natural and sustainable way.

MELANGE

The first appeal of all the FRISTED QUALITIES is the beautiful melange colours, that vibrate with light, as you can see on the cover of this booklet.

The melange yarn is made up of fibers dyed in multiple colours. The fibre dyeing gives a more soft hand feel than solid dye.

RWS

Our lambswool & merino wool has the Responsible Wool Standard certificate. It guarantees that animals are treated well - mulesing is banned.

Environmental & social standards are maintained in the entire supply chain - from farm to final product.

CARE

Wash wool as little as possible.

Instead freshen up by airing outside or steam the garment.

A soft brush can be used lengthwise to remove dust & dirt.

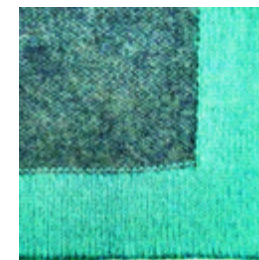

Wash wool carefully, in about 30°C by hand or on the wool programme using liquid detergent.

Dry flat on a towel &

shape the garment while moist.

Store clean garments together with cedar wood to keep moths away.

MELANGE ECO COTTON

PROPERTIES OF COTTON

Cotton is one of the most beloved and versatile natural fibres.

It offers softness and comfort,
and is exceptionally strong and durable.

Ideal for everyday use.

Our melange cotton is combed. It makes the fibre softer,
stronger, and smoother than regular cotton because it
undergoes an extra cleaning and refining step:
the combing process.

This process uses fine-toothed combs to remove
short fibres and impurities, leaving behind only long,
uniform fibers, resulting in a more durable,
less fuzzy, and more breathable
high-quality knitwear

ORGANIC COTTON

All our cotton is made from GOTS certified yarn.

The GOTS Certification ensures: Organic raw materials.

No hazardous chemicals. Treated wastewater.

Protected workers' rights. No child labour.

Ensures traceability in the supply chain.

Our yarn and dyeing process are certified,
not yet the garment production or accessories.

CARE

Wash at 30°C - 40°C with a mild detergent
to preserve the colours.

Airdry, away from heat sources and direct sunlight,
to prevent colour shading.

Iron while moist.

YAK

Yaks are basically long-haired cows,
living on the Tibet Plateau.
They are well adapted to high-altitude & ice-cold
temperatures with their fur to keep them warm.
Yak is pure luxury, still at affordable prices.

We have kept the original characteristics of the yak -
the shine & the strength and the long soft hairs
by refraining from bleaching.
Bleaching is a proces that ruins the fibre
and makes it break easily.
Therefore our colours are a deep & dark melange.

ETHOS

We only use wool from big animals
sheep size and bigger
as they have good lives, they roam free,
and are treasured by the shephards.
Yaks contribute to maintain the delicate ecosystem
& they do not cause erosion of the grassland.
Yak is an innately ethical fibre.

DARK BROWN
is the predominant
natural colour of the yak

MOLTING

A yak ox shedding the underdown. It is collected by hand in the spring.

HABITAT

There are presently 13 million yaks on the Tibetan Plateau and beyond, into Mongolia, Eastern Russian, the Himalayan regions and parts of Central Asia. They live in herds of up to 400 head, their meat and milk sustaining about 3 million nomads.

KHULLU

Yak khullu is the soft underdown that the yak grow in the fall and shed in late spring. Soft and warm, it insulates the yak from the extreme cold.

COLOURS

The natural colours of the yak, is light brown (latte), similar to colour 160 earth & dark brown (coffee). White yaks do exist, but are rare.

CARE

Wash wool as little as possible. Instead freshen up by airing outside or steam the garment. A soft brush can be used lengthwise to remove dust & dirt. Wash wool carefully, in about 30°C by hand or on the wool programme using liquid detergent. Dry flat on a towel & shape the garment while moist. Store clean garments together with cedar wood to keep moths away.

SIZES

The sales collection is in size medium. It is available in sizes S - M - L - XL - XXL. Sizes are graded with 6 cm on the full WIDTH measurement. For example, if the chest is 98 cm in size M - size L will be + 6 cm = 104 cm.

Length is graded by 2 cm between sizes.

The sizes are aligned with Himalaya measurements

MEASUREMENTS

Each style has the full chest measurement, and the length marked. The length is measured from the shoulder point – please see photo.

NECK DROP

Neck drop is measured from the shoulder point – (next to the neck edge) – to the bottom of the neck hole

LENGTH MEASUREMENT

Shoulder point – is measured from bottom edge till shoulder – just below the neck edge.

TIGHT

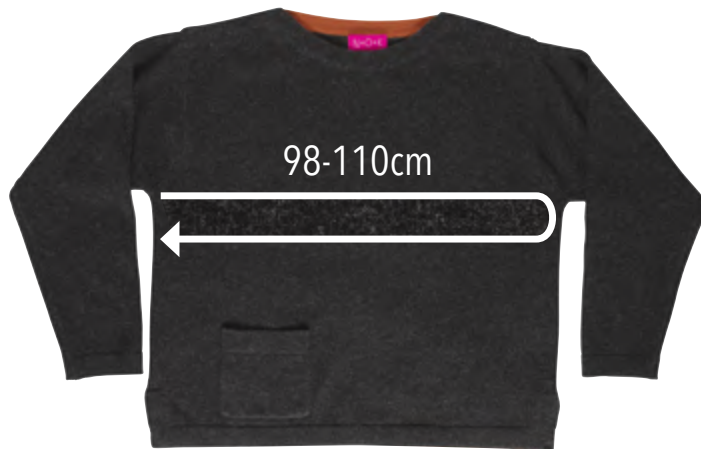

with fitted waist

FIT

In the FRISTED AW26 collection, there are 3 fits : tight, relaxed and oversize.
If the length is shorter than 60 cm, 'short' is written next to the style.
